

Join the AI Adventure...

Revolutionize Your Industry with Generative AI

Generative AI is rapidly becoming a cornerstone for business leaders and is increasingly integrated into essential business software. This includes enterprise-level platforms that manage IT, e-commerce, customer experience, human resources, supply chain, and finance. However, simply having Generative AI tools—even in platforms you already rely on—doesn't guarantee strong outcomes.

Enter Rubiscape's Operate services. We can help you take the Generative AI capabilities embedded in enterprise platforms and make them your own by training, tuning, managing, and optimizing them for your specific business needs.

Advantages of GenAI Over Traditional AI

- ✓ **Flexibility and Versatility:** Handles and generates multiple data types using the same model.
- ✓ **Creativity and Innovation:** Produces unique content and enhances problem-solving.
- ✓ **Efficiency and Speed:** Quickly generates high-quality outputs and automates creative tasks.
- ✓ **Scalability:** Manages vast amounts of data and continuously improves with new inputs.
- ✓ **Personalization:** Generates tailored content and recommendations for individual users.
- ✓ **Cost-Effectiveness:** Reduces data labeling needs and operational costs.

Why GenAI

GenAI represents a new era of AI technology capable of producing new text, images, video, or audio based on learned patterns from existing data. Its ability to handle diverse data types and generate unique outputs makes it a powerful tool for various business applications.

Key Features

Analyzes dashboard images, and provides deep insights from visual data.

Analyzes audio data, and extracts transcripts, sentiment analysis & Topic of Discussion

Processes text, and generates summaries, insights, and other relevant textual data.

Ask Questions to your database to extracts and analyze data from various databases

Generate faster and efficient AD campaign with fresh Ideas and avoid creative Blocks.

Analyze different programming languages & code files to get desired results in no time.

CAPABILITIES

**Visual
Discovery**

**Audio
Analytics**

**Text
Analyzer**

**Data
Navigator**

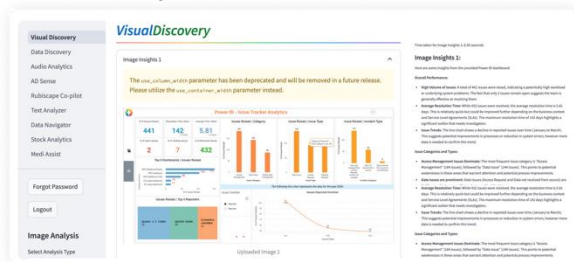

**AD
Sense**

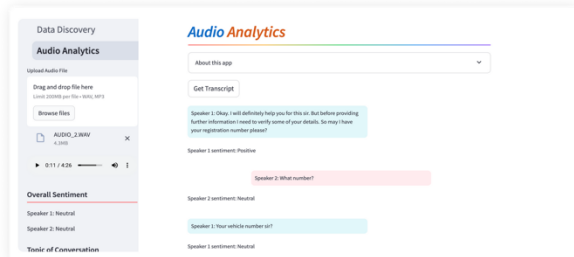

**Rubiscape
CoPilot**

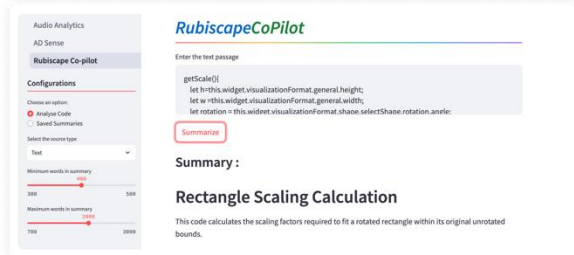

Visual Discovery

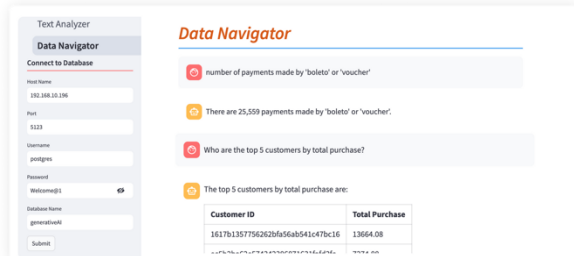

Audio Analytics

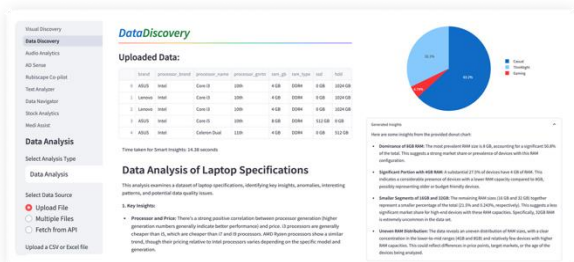

Rubiscape CoPilot

Data Navigator

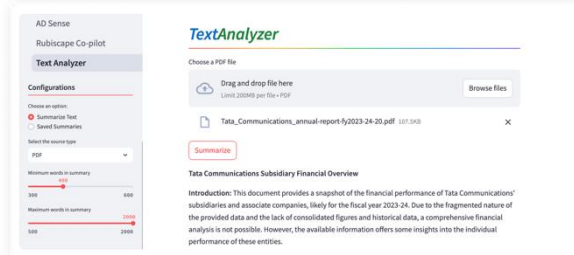

Data Discovery

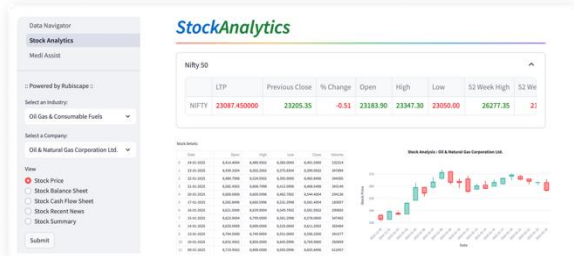

AD Sense

Text Analyzer

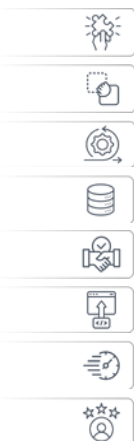

Stock Analytics

A multi-persona Data Science & Machine Learning (DSML) platform

We enable every organization and everyone within the organization to tell better data stories. Stories that identify, define, and solve some of the most complex data problems and help you build the solutions for the future!

One solution for all your Data needs

Simple and Fast, Drag-and-Drop

Agile, Secure and Scalable

Integrated Data ops - Ml Ops - Viz Ops

Best in class Total Cost of Ownership

Flexible deployments – on-Prem & Cloud

3X faster Data pipelines, 5X lower TCO

A Revolutionary User Experience

Code Less, Do More!
